ITT Releases 2026 Sustainability Update

STAMFORD, Conn., Nov. 9, 2026 – ITT Inc. (NYSE: ITT) today released its 2026 Sustainability Update, which details the company's achievement of its emissions reduction target, safety improvement and an update on the Board.

"In 2025, ITT made significant progress in building a more sustainable company for our shareholders, our customers and our employees. Safety is always our first priority, and our continuous improvement mindset is demonstrated by our best safety performance to date.

We delivered on our sustainability commitments by achieving our Scope 1 and 2 greenhouse gas (GHG) emissions target one year early, driven by greater efficiency across our operations and the increased use of renewable electricity. Whilst we are proud of the results we achieved in 2025, we are never satisfied, and we strive to continuously improve in everything we do.

On governance, we also strengthened our Board in 2026: Nazzic Keene succeeded Tim Powers as Non-Executive Chair in May, and Bertrand Loy and Kevin Wheeler joined the Board in August," said ITT's Chief Executive Officer and President Luca Savi.

Scope 1 and Scope 2 GHG emissions decreased 13% against a comparable 2021 baseline, exceeding the 10% target. Including the 2024 acquisitions of Svanehøj and kSARIA, emissions decreased by 10% or 40% on a revenue-weighted intensity basis, demonstrating ITT's improved carbon efficiency. ITT also drove its best safety year to date with significant year-over-year improvement in both injury frequency (IFR) and injury severity (ISR) rates.

About the 2026 Sustainability Update

The update incorporates metrics from 2021 through 2025 for global ITT locations, with Svanehøj and kSARIA included beginning in 2025, their first full years as part of ITT following their acquisitions in 2024. Several guidelines and measurement frameworks, including those provided by the Sustainability Accounting Standards Board (SASB) and the Task Force on Climate-related Financial Disclosures (TCFD) informed the scope of this report.
