SAFE HARBOR AND NON-GAAP DISCLOSURES

Safe Harbor

This presentation contains “forward-looking statements” intended to qualify for the safe harbor from liability established by the Private Securities Litigation Reform Act of 1995. In addition, the accompanying webcast may include, and officers and representatives of ITT may from time to time make and discuss, projections, goals, assumptions, and statements that may constitute “forward-looking statements”. These forward-looking statements are not historical facts, but rather represent only a belief regarding future events based on current expectations, estimates, assumptions and projections about our business, future financial results and the industry in which we operate, and other legal, regulatory and economic developments. These forward-looking statements include, but are not limited to, future strategic plans and other statements that describe the company’s business strategy, outlook, objectives, plans, intentions or goals, and any discussion of future events and future operating or financial performance.

We use words such as “anticipate,” “estimate,” “expect,” “project,” “intend,” “plan,” “believe,” “target,” “future,” “may,” “will,” “could,” “should,” “potential,” “continue,” “guidance,” and other similar expressions to identify such forward-looking statements. Forward-looking statements are uncertain, and, by their nature, many are inherently unpredictable and outside of ITT’s control, and involve known and unknown risks, uncertainties and other important factors that could cause actual results to differ materially from those expressed or implied in, or reasonably inferred from, such forward-looking statements.

Where in any forward-looking statement we express an expectation or belief as to future results or events, such expectation or belief is based on current plans and expectations of our management, expressed in good faith and believed to have a reasonable basis. However, there can be no assurance that the expectation or belief will occur or that anticipated results will be achieved or accomplished. More information on factors that could cause actual results or events to differ materially from those anticipated is included in the Risk Factors section of the Company's Annual Report on Form 10-K, Quarterly Reports on Form 10-Q and other documents filed from time to time with the Securities and Exchange Commission.

The forward-looking statements included in this presentation speak only as of the date hereof. We undertake no obligation (and expressly disclaim any obligation) to update any forward-looking statements, whether written or oral, as a result of new information, future events or otherwise.

Non-GAAP Disclosures

This presentation and the discussion on the accompanying conference call contain certain financial measures that are not prepared under U.S. GAAP. These non-GAAP financial measures supplement our GAAP disclosures and are not meant to be considered in isolation or as a substitute for the most directly comparable measures that are prepared in accordance with GAAP. These measures may not be comparable to similarly titled measures disclosed by other companies. For a reconciliation of these non-GAAP financial measures to the most directly comparable measures disclosed under GAAP, refer to the supplemental data to this presentation or investors.itt.com.

STRONG Q1 RESULTS

REVENUE

+10%
Organic revenue growth

ADJUSTED OPERATING INCOME AND MARGIN

+120 bps
Adjusted operating margin expansion

ADJUSTED EPS

+21%
Adjusted EPS growth

FREE CASH FLOW

+\$62M
Free cash flow

ACQUISITION OF MICRO-MODE

SPECIALIZED DEFENSE AND SPACE CONNECTORS

- | Differentiated miniature and high-bandwidth specialized connectors for smart defense systems
- | Expertise in highly customized radio frequency and hermetic connectors for harsh applications
- | Sole-sourced position on majority of awarded programs
- | Proven engineering and manufacturing capabilities enhance ITT's product and customer base
- | Alignment to ITT values – responsive to customer needs, willingness to serve, relentless focus on quality

Micro-Mode

EXPECT STRONG Q2

- | Continued topline performance in IP; Friction OE outperformance ramping
- | CCT aero components growth offset by de-stocking in connector distribution
- | MT margins improving sequentially as anticipated
- | Productivity, pricing and cost containment driving strong EPS growth
- | Free cash flow accelerating sequentially; executing on capital deployment

KEY PERFORMANCE INDICATORS & NON-GAAP MEASURES

Management reviews a variety of key performance indicators including revenue, segment operating income and margins, earnings per share, order growth, and backlog, some of which are calculated on a non-GAAP basis. In addition, we consider certain measures to be useful to management and investors when evaluating our operating performance for the periods presented. These measures provide a tool for evaluating our ongoing operations and management of assets from period to period. This information can assist investors in assessing our financial performance and measures our ability to generate capital for deployment among competing strategic alternatives and initiatives, including, but not limited to, acquisitions, dividends, and share repurchases. Some of these metrics, however, are not measures of financial performance under accounting principles generally accepted in the United States of America (GAAP) and should not be considered a substitute for measures determined in accordance with GAAP. We consider the following non-GAAP measures, which may not be comparable to similarly titled measures reported by other companies, to be key performance indicators for purposes of our reconciliation tables.

Organic Revenues and **Organic Orders** are defined, respectively, as revenue and orders, excluding the impacts of foreign currency fluctuations and acquisitions. The period-over-period change resulting from foreign currency fluctuations is estimated using a fixed exchange rate for both the current and prior periods. Management believes that reporting organic revenue and organic orders provides useful information to investors by helping identify underlying trends in our business and facilitating comparisons of our revenue performance with prior and future periods and to our peers.

Adjusted Operating Income and **Adjusted Segment Operating Income** are defined, respectively, as total operating income and segment operating income, adjusted to exclude special items that include, but are not limited to, restructuring, certain asset impairment charges, certain acquisition-related impacts, and unusual or infrequent operating items. Special items represent charges or credits that impact current results, which management views as unrelated to the Company's ongoing operations and performance. **Adjusted Operating Margin** and **Adjusted Segment Operating Margin** are defined as adjusted operating income or adjusted segment operating income, respectively, divided by revenue. **Adjusted Segment Incremental Operating Margin** is defined as the change in adjusted segment operating income divided by the change in revenue. We believe these financial measures are useful to investors and other users of our financial statements in evaluating ongoing operating profitability, as well as in evaluating operating performance in relation to our competitors.

Adjusted Income from Continuing Operations is defined as income from continuing operations attributable to ITT Inc. adjusted to exclude special items that include, but are not limited to, restructuring, certain asset impairment charges, certain acquisition-related impacts, income tax settlements or adjustments, and unusual or infrequent items. Special items represent charges or credits, on an after-tax basis, that impact current results, which management views as unrelated to the Company's ongoing operations and performance. The after-tax basis of each special item is determined using the jurisdictional tax rate of where the expense or benefit occurred. **Adjusted income from continuing operations per diluted share (adjusted EPS)** is defined as adjusted income from continuing operations divided by diluted weighted average common shares outstanding. We believe that adjusted income from continuing operations and adjusted EPS are useful to investors and other users of our financial statements in evaluating ongoing operating profitability, as well as in evaluating operating performance in relation to our competitors. .

Free Cash Flow is defined as net cash provided by operating activities less capital expenditures. **Free Cash Flow Margin** is defined as the ratio of free cash flow to revenue. We believe that free cash flow and free cash flow margin provides useful information to investors as it provides insight into a primary cash flow metric used by management to monitor and evaluate cash flows generated by our operations.
